Work Experience

QACA – Cyber Security Engineer & Full Stack Developer

Nov 2024 – Present

Noida, India

- **VAPT & Posture Hardening:** Performed vulnerability assessments and penetration testing for high-profile clients, including:
 - * Adani Edu
 - * Globcom Systems
 - * Apache Footware

Implemented robust posture hardening measures to mitigate critical security risks.

- **Zabbix Monitoring & Client Reporting (VeeGee Industrial):** Engineered a comprehensive **Zabbix** solution for real-time network traffic analysis and tailored dashboards for client executives to monitor infrastructure health, drastically reducing incident response time through automated email alerts.
- **Flowable BPMN & Django Backend:** Built a complex workflow using **Flowable** for task automation, supported by a **Django** portal featuring bulk data upload, detailed employee work insights, and real-time dashboard monitoring.
- **Two-Wheeler Safety Application:** Developed a comprehensive safety solution comprising a web application and mobile app designed to monitor rider safety metrics and enhance situational awareness on the road.
- **Security Tooling:** Configured specialized security tools to enhance threat detection capabilities across client infrastructure.

RMSI – Web Developer

Jan 2024 – Sep 2024

Noida, India

- **Web Maintenance & SEO:** Optimized and maintained the corporate website using **HTML, CSS, JavaScript, and PHP**, improving page load times and adhering to modern SEO standards.
- **Cross-Functional Collaboration:** Partnered with marketing and design teams to translate business requirements into responsive UI components, directly supporting digital marketing campaigns.

QSpiders – Web Development Trainee

Jul 2023 – Dec 2023

Noida, India

- **Full Stack Training:** Completed a rigorous 5-month training program covering **HTML, CSS, JavaScript, PHP, and Java**, culminating in the deployment of functional web applications.
- **Development Best Practices:** Gained hands-on experience in version control, Agile methodologies, and writing clean, maintainable code in full stack environments.

Education

IK Gujral Punjab Technical University, Kapurthala, Punjab

June 2019 – June 2023

Bachelor of Technology (B.Tech) in Electronics and Communication

CGPA: 8.01 / 10

Technical Skills

Cyber Security: VAPT, Posture Hardening, Network Monitoring, Zabbix

Languages & Frameworks: Python (Flask), Java (Flowable BPMN), PHP, JavaScript

Web Technologies: HTML5, CSS3, WordPress, REST APIs

Database & Tools: MySQL, Linux, Git, Task Automation

Soft Skills: Analytical Thinking, Project Leadership, Client Management, Team Collaboration

Projects

QacaShield – Privacy-First Assignment & Safety Tracking System

Node.js, Express, MySQL, React, Flutter, Leaflet, pm2

- Built a full-stack platform for two-wheeler fleet assignments, featuring geofenced start/destination/home detection and early-exit handling.
- Implemented helmet safety verification via selfie uploads, backend storage, and an admin review UI with side-by-side before/after photo comparison.

- Refactored the domain from "trips" to "assignments", updating the database schema, REST APIs, and admin/mobile clients to improve business reporting and analytics.

Workflow Automation Dashboard with Flowable *Flowable BPMN, Spring Boot, REST APIs, MySQL, JavaScript*

- Designed and deployed a business process automation system using **Flowable BPMN** integrated with Spring Boot and RESTful APIs. Enabled scalable and modular workflow management.
- Implemented CSV export functionality and created a dynamic dashboard to track **completed and pending jobs**, improving operational visibility and reducing manual effort by 60%.

IT Metrics Monitoring Dashboard *Python, Flask, Chart.js, Bootstrap, SQLite*

- Developed a Flask-based dashboard for real-time monitoring of IT metrics such as **spam emails blocked, tickets resolved, and server uptime**.
- Used Chart.js for dynamic data visualization and implemented user authentication for secure admin-level access.

Smart Shoe for Visually Impaired *Arduino UNO, Ultrasonic Sensors, GSM Module*

- Engineered a wearable assistive device for the visually impaired with **obstacle detection, voice alerts, and real-time GPS tracking** using GSM communication.
- Enhanced mobility and safety for users, validated through prototype field testing in indoor and outdoor environments.
